

Dear Valued Customer,

We are proud to announce that Government Payment Service, Inc. dba GovPayNet has changed its legal name to AllPaid, Inc. as part of our ongoing evolution. We chose the name AllPaidsm to better reflect our larger mission *to modernize our communities and unlock efficiencies for citizens and governments.*

For more than twenty years, GovPayNet has consistently provided turnkey payment products and quality support to become a market leader in payment services for the public sector. Our new goal is to significantly upgrade and enhance our technology platforms to provide you with the most modern, secure, and broadest scope payment solution in the industry.

The AllPaid brand is more than a name; it communicates our promise to you and to your citizens to be simply the best in the business. We are investing heavily in people and products to make the AllPaid promise a reality. The effort began with a successful move in 2019 to our parent organization's data center, giving us access to enterprise-level operations and security capabilities. In the short term, you will see very little change as we continue to provide our services under the trusted GovPayNet[®] brand.

Most of the immediate, visible changes will involve minor edits to some of our forms and various legal and compliance materials. Be assured, however, that AllPaid has drawn up a roadmap for where we want to go. We are already re-engineering our practices for supporting your day-to-day needs. There is nothing you are required to do as a result of our name change. Our plan will make this as seamless as possible. This is another reason we chose to continue operating publicly as GovPayNet for the next few months.

We are so very excited for what lays ahead and we want to make sure you are too! In 2020 you will see the AllPaid brand come to life in visible and practical ways. We will provide much more information all along this exciting journey. We call this project, "Becoming AllPaid." We are confident that you are going to love what you'll see and how our products and platforms will evolve to make your payment services even more modern, flexible, and efficient.
