Essential Add-On Software Summary Overviews

Point of Sale (cash entry and receipting): Used at the front counter and will eliminate the hand writing of receipts. Point of Sale (POS) is interfaced to Banyon Fund Accounting, Utility Billing, and Permits. All transactions taken in through POS are transferred to the correct program and typically posted during end of day process. This software will save time, money, and dramatically improve efficiency with the way transactions are processed• Interfaces

with all Banyon applications: utility billing, invoicing, permits, licenses, pet licenses, cemetery, violations, inventory, assessments, and property tax. • Easily lookup utility bill for customer to pay or simply select from the service list an item for customer to buy. • Shortcut keys are available to access services and other Banyon lookups. • Receipt screen shows different payment options and shows change due. • End of day/Mid day processing to balance cash drawer and run reports. • Distribution screen shows all transactions by type and will then distribute to the correct Banyon software program based on data path set up. • POS will eliminate had writing a receipt and then manually entering it into utility billing, accounting, or other Banyon programs.

Property Management: Property Management will help your community track information about properties like: Legal descriptions, Building information (bedrooms, baths, sizes), Zoning information, and Owner. Modules can be added to help track violations, permits, licenses, cemetery records, property tax, and pet license.

Zoning/Code Violations: Used to generate notices for properties or customers that are in violation of an ordinance. • Unlimited number of violations • Customize up to 4 different notices per violation. • Track revenue by violation type and transfer to WinFund. • Store picture of violation as proof. • Memo field of violation can print on the perpetrator's notice. • Set compliance date before fee will apply.

Cemetery Records Management: Organize your cemetery records in this database rather than a spreadsheet or books. Saves time with easy look up and reporting of specific information. Ex., Want a report for all veterans of a certain war or branch of military? Very easy to generate! • Track burial information like: cause of death, place of death, funeral home, funeral location and time, burial #, burial date, • Track military info like branch, conflict, enlisted date, discharge date, plaques, and duties. • Track maintenance and fees. • Record information about the deed. • Show marker information like type, size, vendor, inscription, and even show a picture. • Mapping feature shows overview of cemetery and then more detailed layout of lots and plots. • Generate reports from all fields listed.

Pet License: Improve the process of how pet licenses are issued, tracked, and renewed. Easily generate renewal notices that fit into a window envelope. • Keep track of: type, breed, pet name, color, date born, sex, spayed or neutered, tag#, issue date, expire date, status, show picture, vet info, rabies info, impound info, and more. • Print application and license. • Easily print renewal notices by expire up to date. • Report on any field listed using report writer. • Tracks impound information and prints release form. • Assign violations and other misc. fees.
