

Banyon Data Systems

brings you
simple, fast & integrated
credit card processing software!

www.banyon.com

TAKE YOUR BUSINESS TO THE NEXT LEVEL WITH X-CHARGE INTEGRATED CREDIT CARD SOFTWARE

An exciting new feature has been added to your Banyon Point of Sale (POS) Software, integrated credit card processing. This new integrated feature allows you to enter credit card payments directly through your transaction! You no longer need to purchase or lease costly credit card terminals, because within your Banyon POS Software you will have the ability to swipe the card or manually enter card information on your keyboard. And because Banyon uses X-Charge, you can accept all major credit and debit cards.

Designed for Windows NT, 2000, XP, and Vista, X-Charge credit card processing software provides merchants with a fast and secure payment-processing platform that can be used by any Windows compatible personal computer. You can process transactions via a dial-up connection or a high speed internet connection. (NOTE: Dial-up requires an external modem)

Banyon and X-Charge are committed to offering your business the most competitive edge possible. The X-Charge team offers a **FREE** analysis of your existing merchant services and a full comparison on all of the rates and fees involved with processing credit cards. To date, 90% of our clients have shown savings! Banyon Software makes credit card processing quick and easy, and the X-Charge software gives you fast authorizations and constant reliability. It's a true advantage.

To find out more, contact your X-Charge representative Ramon Corona using the contact information below. If you would like to take advantage of the **FREE** analysis and rate comparison, simply fax a recent Visa/MasterCard statement to 702.446.0473 with your contact information.
