Receipt barcode scanning for Utility Billing, Invoicing, and Point of Sale

- Barcode module will print a receipt barcode on all bills your Banyon Software generates.
- Use with Utility Billing, Point of Sale, Fund Accounting (Invoicing), and Property Tax Collection.
- Save time spent on looking up accounts, bills, or invoices being paid.
- Simply scan barcode and entry is made into the receipt batch or transaction window of Point of Sale.
- Fast entry feature in utility billing allows bills being paid in full to be scanned one after another directly into the receipt batch.

To begin using, call Banyon to activate the barcode printing module and then purchase a barcode scanner like the sample shown. (Banyon does not sell the actual barcode scanner)
