

BANYON DATA UTILITY BILLING MANAGEMENT

Banyon Data is a software company that provides full featured solutions for local governments, public entities, and utilities. Some of their products include fund accounting, utility billing, payroll, building permits, licenses, and more. They have been in business since 1988 and have over 2000 installations across different sectors.

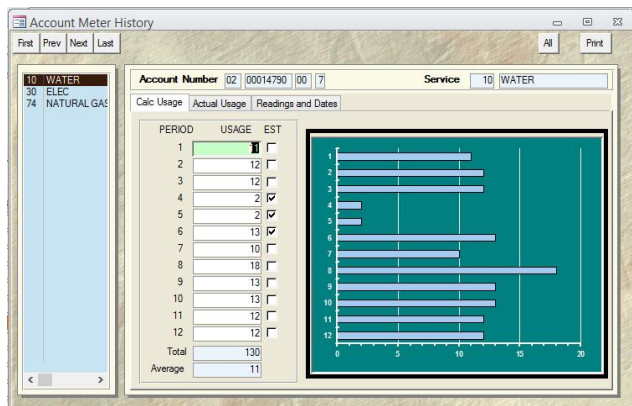

Banyon Data Utility Billing is a software solution that helps you bill and manage your utility services, such as water, sewer, electric, gas, garbage, recycling, and more. It allows you to create detailed customer accounts, attach customized services and rates, track meter readings and usage, print bills and notices, process payments and adjustments, generate reports, and more.

It also integrates with Banyon Data Fund Accounting as well as other modules such as online payments, e-bills, all popular meter reading device interfaces  , and more.

You can choose between the Advanced version or the UBLite version, depending on your needs and budget.

[You can find more information about Banyon Data Utility Billing on our website at www.banyon.com.](http://www.banyon.com)

If you are interested in seeing the software, you can request a free demo or contact their sales team. I hope this answers your question.
